

Pet Name: _____

Date: _____

Surgery Form

Please circle yes or no for the services you would like and sign below.

If your pet has fleas, ticks, or parasites they will be treated at a fee to the client.

We recommend pre-anesthetic bloodwork on all animals, but it is **required for any animal 8 years of age and older**. It is an extra safety parameter we use to make sure your pet has the best care possible. The bloodwork checks the kidney, liver, pancreatic, blood sugar, and blood counts. If there are any abnormalities in the bloodwork we may hold off on an anesthetic procedure and address the underlying cause.

Bloodwork \$85

YES / NO

If you would like your pet microchipped, we can do that while they are sedated as well. This procedure can be done routinely without any sedation but if you are planning on getting a microchip it is a good time to have one done.

Microchip \$49.99

YES / NO

We pre medicate all our surgery patients with pain medication to make wakeup and recovery as easy as possible on your pet. If you would also like your pet to be sent home on any additional pain medication, please let us know.

Pain medication home \$17.00

YES / NO

Please let us know if you would like an e-collar to take home with your pet

E-collars range in price from \$8.00 - \$15.00

YES / NO

We now offer laser therapy which helps with pain and promotes healing.

Cost is \$25.00 YES/NO

NOTICE: All surgery patients will be pre medicated. This will result in a \$25 fee for clients with a spay/neuter certificate. The certificate will cover anesthesia and surgery costs.
